

Unit 4

21st Century Skills Project

Future careers

**1 Communication**

In groups of three answer these questions.

1 What careers do you think will need to emerge in the future?

2 What kind of people will study these careers?

**2 Collaboration**

Invent a new career. You can combine two existing careers in order to come up with a brand-new career.

Here are some examples:

- Robot surgeon
- Flying car mechanic
- Alien teacher.

**3 Creativity**

Design a poster advertising the new career you have created. Add the following information:

- Name of the job
- What they do
- Education required
- Salary

**4 Evaluation**

Put the posters on the wall and answer the questions.

- Do you think this job is plausible? Why or why not?
- Would you be interested in studying this? Why or why not?

**5 Communication**

Role-play a job interview for one of the new careers.

- In pairs, decide who is the interviewer and who is applying for the job.
- Prepare a set of questions to answer.
- Get together with your partner and imagine you are in a job interview.
- Did you get the job?
